

FOR IMMEDIATE RELEASE**Dresser Wayne Helps Crescent Oil Go Green with Dispensers and Fusion™ Universal Site Controller**

AUSTIN, TX January 26, 2009 - Crescent Oil is advancing alternative fuel infrastructure through the recent purchase of Dresser Wayne Ovation® iX™ fuel dispensers and the Fusion™ Universal Site Controller. As a result, the sites will be able to sell a wide range of ethanol fuel blends and streamline operations with improved payment security and remote management.

“The Fusion controller’s technology helps us make the most of our equipment,” Phil Near, President of Crescent Oil says. “It is an excellent tool for increasing efficiency and reducing costs.” Crescent Oil selected the Ovation iX fuel dispenser for its flexible hose configuration enables the company’s retail sites to dispense high blend ethanol fuels for flex fuel vehicles through one hose while dispensing lower ratio blends through another hose. It is the first dispenser to offer blended products on multiple hoses. “This capability is a significant step toward increasing the distribution of eco-friendly fuels, particularly because many states are beginning to mandate dedicated hoses for high-ratio ethanol fuels,” Scott Negley, director of Dresser Wayne North American product management says.

The Dresser Wayne Ovation dispensers are compliant with the latest payment security regulations from the Payment Card Industry (PCI), another key reason Crescent Oil will implement the solution. iX™ Pay secure payment is a scalable solution that exceeds the current regulatory requirements and provides a solid platform to meet upcoming standards. The Ovation iX dispensers feature the iX Technology Platform that also offer optional multimedia marketing, remote monitoring and a redundant in-dispenser point-of-sale system.

In addition to the eco-fuel capabilities of the dispensers, the company is taking advantage of Dresser Wayne’s Fusion Universal Site Controller. It seamlessly controls multiple ethanol blends in the dispenser from a wide variety of fuel feedstocks, as well as a wide range of equipment functionality. The Fusion controller offers remote management of multiple systems and dispensers across several sites. It consolidates and simplifies the management of devices, even those from different vendors and in different locations. The combination of the Ovation iX fuel dispenser and the Fusion Universal Site Controller gives Crescent Oil a powerful alternative

fuel solution. “Dresser Wayne is providing the equipment we need to not only keep pace with the adoption of eco-fuels, but to define it,” Near says.

About Dresser, Inc.

Dresser, Inc. is a leader in providing highly engineered infrastructure products for the global energy industry. The company has leading positions in a broad portfolio of products including valves, actuators, meters, switches, regulators, piping products, natural gas-fueled engines, retail fuel dispensers and associated retail point of sale systems and air and gas handling equipment. Leading brand names within the Dresser portfolio include Dresser Wayne® retail fueling systems, Waukesha® natural gas-fired engines, Masoneilan® control valves, Mooney® regulators, Consolidated® pressure relief valves, and Roots® blowers and rotary gas meters. It has manufacturing and customer service facilities located strategically worldwide and a sales presence in more than 100 countries. The company's website can be accessed at www.dresser.com.

About Dresser Wayne

Dresser Wayne, headquartered in Austin, Texas, is one of the largest business units of Dresser, Inc., and is an industry pioneer for the retail fueling industry. Among its innovations, Dresser Wayne was the first to introduce self-service consoles and fuel blending dispensers to service stations, in-pump card readers and cash acceptors, in-pump radio frequency identification payment systems and dispenser-mounted touch screen payment/communication systems. In addition, Dresser Wayne designs and markets software systems that enable its retail fueling customers to manage the convenience store aspects of their businesses more efficiently, including inventory control, price book management, labor management and site administration. The Dresser Wayne website is www.dresserwayne.com.
