

FOR IMMEDIATE RELEASE

DRESSER WAYNE SHOWCASES FUTURE FOCUS AT IFFE SHOW

Fueling technology leader to share innovation, strategies for C-Store profit building

MALMÖ, SWEDEN (February 25, 2009) – Dresser Wayne, a global marketer of retail fuel dispensers and technologies, will be sharing its steady focus on innovation with convenience store retailers during the International Forecourt and Fuel Equipment Show in Birmingham, UK, March 1 through 3. The technology leader is helping fuel retailers weather turbulent times with strategic technologies designed to streamline operations, support loyalty-building customer experiences, and smoothly deliver eco-fuels.

Dresser Wayne will be demonstrating retailer-centric forecourt solutions during the event including new additions to popular dispenser models, precise fuel metering capabilities and regulation-compliant secure payment as well as advanced site control. “Businesses worldwide are facing complex market issues,” Soren Powell-Holse, Sales Manager Dresser Wayne UK & Ireland says. “Dresser Wayne is meeting the current financial climate with products and services that specifically address fuel retailers’ most pressing challenges, such as reducing costs and doing more with less.”

The Xflo™ fuel meter will be a featured money-saving product in the Dresser Wayne booth. Its groundbreaking design virtually eliminates meter drift which dramatically reduces retailer expense and protects fuel inventories. Additionally, iX™ Pay secure payment will be on display. Built to the highest level of payment security regulatory standards, the compliant pay-at-the-pump terminal can be upgraded to meet upcoming regulations without significant equipment reinvestment.

Another cost-saving solution that will be shown is the Fusion™ universal site controller. It centralizes control over forecourt and c-store devices for a new level of streamlined functionality. And the Automatic Temperature Compensation device can also save businesses money by ensuring exact amounts of fuel are dispensed regardless of external temperatures.

Dresser Wayne fuel dispensers will be another major focus of the show. Combining state-of-the-art performance with a wide range of iX™ Technology Platform maintenance, management and marketing options, they continue to be a favorite among fuel retailers. The Global Ovation iX dispenser now features an improved hose retraction system, and booth visitors will be among the first to see the upgraded version of the Global Star® V dispenser launching later this Spring. Plus, the popular Global Century will be on the exhibit floor.

Dresser Wayne will be demonstrating eco-friendly technologies as well. Vapour gate and Dresser Wayne's vapour recovery system will be on hand to reveal the ways in which Dresser Wayne is helping retailers reduce harmful vapour emissions and comply with air quality regulations.

About Dresser, Inc.

Dresser, Inc. is a leader in providing highly engineered infrastructure products for the global energy industry. The company has leading positions in a broad portfolio of products including valves, actuators, meters, switches, regulators, piping products, natural gas-fueled engines, retail fuel dispensers and associated retail point of sale systems and air and gas handling equipment. Leading brand names within the Dresser portfolio include Dresser Wayne® retail fueling systems, Waukesha® natural gas-fired engines, Masoneilan® control valves, Mooney® regulators, Consolidated® pressure relief valves, and Roots® blowers and rotary gas meters. It has manufacturing and customer service facilities located strategically worldwide and a sales presence in more than 100 countries. The company's website can be accessed at www.dresser.com.

About Dresser Wayne

Dresser Wayne, headquartered in Austin, Texas, is one of the largest business units of Dresser, Inc., and is an industry pioneer for the retail fueling industry. Among its innovations, Dresser Wayne was the first to introduce self-service consoles and fuel blending dispensers to service stations, in-pump card readers and cash acceptors, in-pump radio frequency identification payment systems and dispenser-mounted touch screen payment/communication systems. In addition, Dresser Wayne designs and markets software systems that enable its retail fueling customers to manage the convenience store aspects of their businesses more efficiently, including inventory control, price book management, labor management and site administration. The Dresser Wayne website is www.dresserwayne.com.
