

FOR IMMEDIATE RELEASE**DRESSER WAYNE FUSION® FORECOURT SYSTEM OFFERS STREAMLINED
PETROLEUM RETAIL SITE MANAGEMENT*****All-new technology solution interfaces with multi-vendor point-of-sale and
forecourt devices for simplified retail fuel site control***

AUSTIN, TX (May 18, 2009) – Dresser Wayne (www.dresserwayne.com), a global innovator of fuel dispensers and technologies, today made available the Fusion® Forecourt System, a petroleum retail management appliance designed to decrease system complexity, future-proof the forecourt, and improve visibility to key systems and fuel inventory by integrating fuel retail devices like fuel pumps, outdoor card terminals, and tank gauges. The single box interfaces with forecourt devices, fuel equipment, and point-of-sale systems from multiple vendors for one point of site control. The new system reduces the number of controllers and appliances needed to operate a multi-device, multi-vendor forecourt.

“Dresser Wayne understands that less complexity and more visibility into business dynamics mean better profits,” Dan Harrell, vice president of systems and technology says. “The Fusion Forecourt System provides streamlined control over many devices, even if the equipment is from different vendors. It not only ties disparate systems together, it helps retailers maximize system capabilities and make the most of their equipment investments.”

Providing interoperability and simplicity, the Fusion Forecourt System lowers deployment and maintenance costs, speeds time-to-market, and minimizes points of failure. It is also modular and upgradeable so businesses can enable additional functionality while protecting site investments.

The Fusion Forecourt System is a solid state, rugged appliance engineered to withstand the harsh temperatures, airborne particles, small spaces and intense 24/7 processing requirements typical of fuel sites around the world. Additionally, it offers in-depth reporting capabilities for enterprise-level visibility into sales, operations, inventory and equipment.

During the NACStech conference, May 18 to 20, at the Gaylord Texan Resort and Convention Center in Grapevine, Texas, Dresser Wayne experts will be available to address questions on

the Fusion Forecourt System. Visit booth #417 to see demonstrations of this and other advanced system products.

An exclusive technology from Dresser Wayne, the Fusion Forecourt Systems is currently available for order. Contact your sales representative for more information or visit www.dresserwaynefusion.com.

About Dresser, Inc.

Dresser, Inc. is a leader in providing highly engineered infrastructure products for the global energy industry. The company has leading positions in a broad portfolio of products including valves, actuators, meters, switches, regulators, piping products, natural gas-fueled engines, retail fuel dispensers and associated retail point of sale systems and air and gas handling equipment. Leading brand names within the Dresser portfolio include Dresser Wayne® retail fueling systems, Waukesha® natural gas-fired engines, Masoneilan® control valves, Mooney® regulators, Consolidated® pressure relief valves, and Roots® blowers and rotary gas meters. It has manufacturing and customer service facilities located strategically worldwide and a sales presence in more than 100 countries. The company's website can be accessed at www.dresser.com.

About Dresser Wayne

Dresser Wayne, headquartered in Austin, Texas, is one of the largest business units of Dresser, Inc., and is an industry pioneer for the retail fueling industry. Among its innovations, Dresser Wayne was the first to introduce self-service consoles and fuel blending dispensers to service stations, in-pump card readers and cash acceptors, in-pump radio frequency identification payment systems and dispenser-mounted touch screen payment/communication systems. In addition, Dresser Wayne designs and markets software systems that enable its retail fueling customers to manage the convenience store aspects of their businesses more efficiently, including inventory control, price book management, labor management and site administration. The Dresser Wayne website is www.dresserwayne.com.
