

FOR IMMEDIATE RELEASE***NEW DRESSER WAYNE TECHNOLOGY HELPS DETER FUEL AND DATA THEFT
Dispenser Secure Access assists retailers in protecting the forecourt***

AUSTIN, TX (May 26, 2009) – Dresser Wayne, a global innovator of fuel dispensers and technologies, announces new forecourt security technology that helps prevent theft of fuel and payment card data. Dispenser Secure Access is a fuel dispenser alarm and monitoring system that helps protect against unauthorized fuel dispenser entry. It provides fuel retailers with an important layer of security against increasing fuel and data theft.

According to the National Association of Convenience Stores (NACS) Online, fuel theft costs retailers more than \$134 million each year, and that number is expected to continue to rise. “Security is a serious concern for retailers and consumers,” says Scott Negley, Director, Dispenser Marketing, “Our Dispenser Secure Access helps to address the problem of forced entry. We have leveraged our expertise in forecourt security to build a solution to act as a deterrent to criminals from gaining access to internal components.”

Dispenser Secure Access is available in two versions. Retailers can choose the level of protection that is right for their business. Dispenser Secure Access Local Alert sounds an alarm and shuts down the dispenser when the door is opened without proper authorization. Dispenser Secure Access plus iSense™ offers the added protection of Dresser Wayne’s iSense Premium Help Desk offering, providing real-time remote monitoring and alert capabilities.

The Dresser Wayne security options include a new bezel locking kit for additional site security. Used alone or with Dispenser Secure Access, this kit leverages industry-proven heavy duty, secure locks to provide an added measure of site security, helping to deter thieves from opening dispensers. Both Dispenser Secure Access and the bezel locks are available as factory loaded options on new Dresser Wayne Ovation® fuel dispensers, as well as in upgrade kits for installed Ovation and Vista fuel dispensers.

Other security offerings from Dresser Wayne include the PCI-compliant iX™ Pay secure payment terminal. Designed to evolve as payment security standards develop, the terminal encrypts information at the dispenser payment keypad.

For more information on the Dresser Wayne Dispenser Secure Access solution and other security options, see www.dresserwayne.com/DispenserSecureAccess.

About Dresser Wayne

Dresser Wayne, headquartered in Austin, Texas, is one of the largest business units of Dresser, Inc., and is an industry pioneer for the retail fueling industry. Among its innovations, Dresser Wayne was the first to introduce self-service consoles and fuel blending dispensers to service stations, in-pump card readers and cash acceptors, in-pump radio frequency identification payment systems and dispenser-mounted touch screen payment/communication systems. In addition, Dresser Wayne designs and markets software systems that enable its retail fueling customers to manage the convenience store aspects of their businesses more efficiently, including inventory control, price book management, labor management and site administration. The Dresser Wayne website is www.dresserwayne.com.
