

FOR IMMEDIATE RELEASE

Nordic Group Awards First Unattended Payment Approval to Dresser Wayne® iX™ Pay Secure Payment Platform

Upgradeable Solution for Fuel Dispensers Helps Protect Motorists Against Card Fraud

MALMO, Sweden (December 21, 2009) - Dresser Wayne (www.DresserWayne.com), a global leader in vehicle energy dispensing technologies, has received PAN Nordic Card Association (www.pan-nordic.org) Unattended Payment Terminal (UPT) approval of the iX Pay Secure Payment solution on the Global Star™ and Global Ovation® iX™ fuel dispensers. The outdoor payment solution includes the Dresser Wayne secure key pad, which is the first Payment Card Industry (PCI) version 2.0 Encrypting PIN Pad (EPP) device to be certified by the Association. Nordic-region fuel retailers will now be able to comply with these standards, and to protect their businesses and their customers from credit and debit card fraud.

The PAN Nordic Card Association supports banks and card issuers with standards and best practices that address unique regional needs, building on the fundamentals of the globally recognized PIN Transaction Security (PTS) standards administered by the PCI Security Standards Council (SSC).

“These industry-first approvals will really benefit our customers the most, giving them a standards-based approach to enhanced security at the pump,” said Tim Weston, product manager for payment technologies at Dresser Wayne. “Our upgradeable iX Pay Secure Payment solution also gives customers the flexibility to meet future security standards.”

The iX Pay Secure Payment solution is available on new Dresser Wayne dispensers and via upgrade kit. It features an encrypting keypad, a secure card reader, user prompt controls, and application software authentication. The solution is compliant with EMV standards which address global interoperability of chip cards with payment systems. It was also the first to be certified to the Version 2.0 standard for PCI Encrypting PIN Pad (EPP) Security Requirements.

About Dresser Wayne

Dresser Wayne, headquartered in Austin, Texas, is one of the largest business units of Dresser, Inc., and is an industry pioneer for the retail fueling industry. Among its innovations, Dresser Wayne was the first to introduce self-service consoles and fuel blending dispensers to service stations, in-pump card readers and cash acceptors, in-pump radio frequency identification payment systems and dispenser-mounted touch screen payment/communication systems. In addition, Dresser Wayne designs and markets software systems that enable its retail fueling customers to manage the convenience store aspects of their business more efficiently, including inventory control, price book management, labor management and site administration. The Dresser Wayne website is www.DresserWayne.com.
