WAYNE HELIX™ 6000 FUEL DISPENSER WITH ADDITIVE

# We believe in magic...

Honestly. We've seen it. Experience it for yourself with the new Helix™ 6000 fuel dispenser with additive; the only Wayne dispenser with the built-in power to transform regular fuel into premium grades.

With the simple inclusion of up to two additive solutions per dispenser, the Helix 6000 dispenser can generate up to four premium fuel grades, without the need to install expensive underground tanks. This cost-saving solution is already transforming forecourts around the globe; it's time you took advantage of the magic.

## Helix 6000 Fuel Dispenser with Additive

*Champion of Versatility*

The Helix 6000 fuel dispenser with additive can deliver up to four additional grades on top of the regular specifications of the Helix 6000 fuel dispenser. All hoses are contained in the hose handling cabinet situated on the side of the dispenser for a sleek look, and because we want the best for your business, we've made the dispenser scalable for easy adaption to any forecourt.

- Designed for ATEX and ANZEx markets
- Supports up to two fuel additives per dispenser
- Nominal tank volume 40 litres per additive system
- Option to combine two tanks in case of one system
- Injection range 500-3600 ppm
- Allows for one or two injection ratios per additive fuel
- Simultaneous dual-sided fuel delivery
- Handling through ordinary fuel nozzle or separate nozzle dedicated for additive injected fuel
